Sensitive detector for windows, doors and more

Is someone trying to pry open a window or steal a piece of art or other valuables? When this sensitive vibration detector is in place, it notices right away.

The best-case scenario is to stop would-be intruders at the moment they attempt to break in, such as when they try to get in through a window. But if they make it past that point, alarm bells should ring when they get near valuable objects.

The Smartvest Pro wireless vibration detector reacts sensitively and reliably to vibrations, e.g. in window glass, which immediately triggers an alarm. This sends out a push notification to connected users via the Smartvest Pro app. The detector's sensitivity can be adjusted to three different levels. It can also keep a smart watch over objects such as safes or works of art. The batteries are long-lasting and easy to replace. For a comfortably secure home. For you and your family.

## Technologies

- Placed on the window, front door, patio door, objects and more, Smartvest Pro wireless vibration detectors reliably detect and report vibrations
- For protection against burglary and theft
- Triggers the alarm and starts all the custom scenarios configured in combination with the Smartvest Pro wireless alarm system
- Sensitivity can be set at three different levels
- Optional comfort function, e.g. "if the cellar door moves, then the light is turned on" in combination with the Smartvest Pro wireless socket and a standard floor lamp
- Easy installation (with adhesive pad or screws and wall plugs, all included); can also be placed on an object (such as a safe or piece of art)

- Includes easily replaceable batteries

## Technical data - Smartvest Pro wireless vibration detector

Area of application	Interior
Battery - battery operation	Yes
Battery - max. battery life	1 y
Battery - quantity	1
Battery - type	CR2032 (3V)
Battery type	Replaceable
Colour	white
Dimensions	73 x 27 x 10 mm
Gross weight	0,051 kg
Housing material	Plastic
Max. humidity	80 %
Max. operating temperature	40 °C
Min. humidity	10 %
Min. operating temperature	0 °C
Net weight	0,019 kg
Radio frequency	868,3 MHz
Radio modulation	FSK
Standby power consumption	0,014 mA
Tamper protection	Yes
Transmission power	11.3 dBm
Wireless range	Depending on installation max. 100 m
