

Steel-O-Flex™ Tresor 1360/85 black

Seite 1 von 2

FULLY KEYLESS PROTECTION

The ABUS Steel-O-Flex™ Tresor 1360 secures your bicycle effectively against theft with its 4-digit numerical code.

The overlapping steel sleeves with 20mm strength encase the inner steel cable like a tough metal shell. Having selected the individually configurable number code, secure your bike without a key using the Steel-O-Flex™ Tresor 1360. Special scanning protection hampers attempts to crack the code through tampering.

At the same time, the embossed digits on the reel enable you to set the right combination even in the dark.

Technologies

- The flexible cable lock has an overall thickness of 20 mm.
- Overlapping steel sleeves provide additional protection for the internal steel cable.
- Plastic coating to prevent damage to the bicycle's paintwork
- Two-component number reels ensure long-term readability of the digits
- Special touch protection for increased security against unauthorised access to the code through manipulation of the mechanism
- Dark-touch function facilitates use in the dark thanks to special imprinting
- Individually configurable code

Operation and use

- Good protection at low theft risk
- Ideal for securing low-cost bicycles

Steel-0-Flex™ Tresor 1360/85 black

Seite 2 von 2

-
- The longer the cable, the easier the bicycle can be locked to a fixed object

Tips

- Due to the steel shells, the Steel-0-Flex™ locks reach a significantly higher security than common cable locks, yet maintaining high flexibility (Double Protection)
- The combination lock is great for use by several people
