Diskus® 25/70

TRUST THE ORIGINAL

Our padlock Diskus® 25 has a reversible key cylinder.

The Diskus® 25 padlock protects your valuables that you store in trucks, vans, cellars or behind factory gates, for example. The lock is made of stainless steel on the inside and outside, the shackle is made of special hardened steel, which makes it particularly tamper-proof. The seam that holds the two stainless steel shells together is also hand-welded on the Diskus® 26, which leaves our production facility in Germany. This means that the two halves cannot be easily broken apart and the Diskus® 25 secures your valuables and objects very well. The padlock is opened with a reversible key. This is a quality and safety feature and stands for high operating comfort. The reversible key always fits in both directions. Five reversible keys are included in the scope of delivery.

Technologies

- High precision reversible key with 8,000 key differs
- Coded keys, spare keys can only be ordered with the code
- Stainless steel - inside and outside
- Hardened steel shackle
