

FOR A SAFE FEELING

This digital door viewer not only offers a generous display. It can additionally create photos.

Sometimes you just want to know exactly who is knocking on your door. But conventional door viewers are often not too convenient to use. Especially if you are already older or physically limited. This digital door viewer is easier to operate. With its 3.2-inch display, the device delivers sharp images, even deep into the night. There is even more security thanks to the possibility of recording what you see as a photo. Mounting the peephole is child's play. It is suitable for door thicknesses from 38 to 110 millimetres.

Technologies
