

FLEXIBLE THANKS TO THE STAINLESS STEEL CABLE

ABUS aluminium locks made of the Titalium™ material work well for a wide variety of applications.

The small and flexible locks have a flexible stainless steel cord instead of a rigid shackle, making them ideal for eyelets that are hard to reach or multiple locking points close to one another. They secure fittings, shed doors, cellar windows, switching stations and more. The key code number on the key can be used to have other keys produced easily.

Technologies

- As the compact safety padlock 72/30, but with a flexible cable as shackle
- Cable out of stainless steel, PU-sheathed
- 5 mm cable diameter
- Can be combined in keying systems together with 72/40, 72/30 and 74/40 safety padlocks
- Key retaining function: the key can only be removed when the padlock is properly locked
- 8 different colours
- 2 different cable lengths
- Available as keyed different, guaranteed keyed different, keyed alike and as master key system

Operation and use

- Optimal use in situations where a rigid standard shackle reaches its limits
- Optimal use in situations when two or more points have to be locked out in a lack of space, e. g. in an electrical control cabinet

72/30CAB20 red

Variants

- 2 different cable lengths, 8 different colours
- 72/30CAB20 (20 cm cable)
- 72/30CAB40 (40 cm cable)
