The International Centre, Telford

Promotions valid from 20.10.23-03.11.23

ABUS UK Showcases innovative security solutions at MLA EXPO 2023

ABUS UK is exhibiting a wide range of product and service innovations designed exclusively for the locksmith trade at the MLA Expo (Stand H2.20) including locksmiths' first glimpse of the new ABUS Retail display stand offering.

A full range of ABUS cylinders and padlocks, including the highly secure X60 3* cylinder range and the cutting-edge Touch 57 biometric padlock will also be on show, along with a range of services and promos curated to meet the unique needs and challenges faced by locksmiths.

The MLA Expo will also serve as the first opportunity for locksmiths to discover the new ABUS retail display stand offerings. ABUS has developed a range of eye-catching POS display solutions to facilitate add-on and upselling opportunities for locksmiths with the ability to customise a unique display tailored to any customer profile. This is achieved thanks to the range of product modules to choose from: they feature best-selling items like high-security and marine-grade padlocks, brass and titanium padlocks as well as security and fire safety products. Adding to its functionality, an 'innovation space' has been designed into each stand to highlight newly launched products. The easy-to-assemble stands come

complete with included products, hooks, a magnetic title strip, and easy display instructions.

Also, in the spotlight at the MLA Expo is the ABUS 480TI Padlock, a lock that offers excellent durability and attack-resistance at a competitive price. Manufactured from TITALIUM™, a unique aluminium alloy, the 480TI delivers robust torsion levels while maintaining a lightweight build. It offers the ability to integrate padlocks into ABUS key systems with a 14mm plug, such as the ABUS Bravus, Vitess, Vela, or Zolit ranges. With its thick, hardened steel shackle and nano-protect coating, the 480TI provides superior protection against bolt cutter attacks and resistance to environmental elements.

Join ABUS on stand H2.20, see our exclusive show offers, see these products first hand, meet the ABUS team and observe live masterkeying, pinning and software demos.

CYLINDER DEALS – E50PS

A locking system with 5 pins for use with retail use available in blister pack format.

Features & Benefits

- Double Euro cylinders
- Thumbturn Euro cylinders
- Half Euro cylinders
- UK Rim cylinders
- Keyed alike are available
- Pinning Kit available
- Available in Nickel and Brass finish

Highlights

- Supplied Key differed with 3 paracentric open profile keys
- Locking elements 5 pins x 6 pin depths
- Universal predetermined pre-snap feature providing greater resistance to unauthorised entry, non-handed
- Over 3,000 key differs available
- Half Eurocylinder with an 8-way adjustable cam
- Half Eurocylinder size 10/30 is suitable for use with ABUS 86TI padlocks

Key Cutting

- The keys do not require any special clamps or cutters to cut keys
- The Silca software card for appropriate key machines is 391

TITALIUM™ 480TI

TITALIUM™ special aluminium and NANO PROTECT™ coating for increased corrosion resistance

Based on the bestselling ABUS 480 brass padlock, the ABUS 480TI is an attractive, cost-effective padlock with access control integration potential. It allows locksmiths the opportunity to build keyed alike or differed systems economically and easily. Where the brass padlock 480/50 is not thick and strong enough and the Service features of 83 are not needed the new 480TI is the padlock of choice.

The price attractive 480TI with its innovative TITALIUM design offers new opportunities to integrate padlocks into ABUS key systems with 14 mm plug.

Features

- Can be integrated into ABUS key systems with 14 mm plug
- Solid lock body made of TITALIUM™ aluminium alloy – high security with low weight
- Hardened steel shackle with NANO PROTECT™ plating
- Double bolted shackle

Advantages

- Extension of padlock range taking 14 mm plugs
- Attractive TITALIUM™ design
- Service ex APF

Details

- In common sizes 45 mm, 50 mm und 60 mm available
- Shackle diameter: 8–11 mm

Unlocking security excellence with ABUS UK's Locksmith Training

As an ABUS Partner, locksmiths gain more than just access to competitive pricing and service support; they also unlock exclusive training through the ABUS Partner program. In the locksmith trade, staying at the forefront of security technology is crucial, and ABUS is dedicated to equipping locksmiths with the skills and knowledge they need to excel in their profession.

One standout feature of ABUS's training program is the Masterkeying Training, complete with exclusive access to the ABUS masterkeying OBS portal for partners. Masterkeying is a critical skill for locksmiths, and ABUS ensures that locksmiths master this technique with precision. The ABUS OBS portal provides partners with cutting-edge cloud-based tools and resources, streamlining the masterkeying process to make it more efficient, accurate, and secure.

Another essential aspect of locksmithing covered by ABUS training is pinning skills. Precise pinning techniques are central to the security of homes and businesses, and ABUS's training program equips locksmiths with the skills needed to handle pinning tasks confidently and expertly.

In addition to specialised training on ABUS cylinders like Zolit, BRAVUS, and Vitess, ABUS offers comprehensive locksmith training programs designed to ensure that locksmiths have the skills and knowledge to install and maintain ABUS products effectively. These programs cover both mechanical and electronic

locking systems and are available in both online and in-person formats, providing locksmiths with the flexibility to train at their own pace.

ABUS's training courses include a blend of theoretical and practical training, ensuring that locksmiths have a deep understanding of the products and the skills to install and maintain them effectively. Comprehensive training materials, including manuals, and installation guides are provided to ensure that locksmiths have the necessary resources to complete installations to a high standard.

ABUS offers flexibility when it comes to choosing the training location: at the locksmith's own premises, at the state-of-the-art ABUS training suite in Bristol, or even online. The goal is to make learning as convenient as possible, allowing locksmiths to focus squarely on honing their locksmithing skills.

Well-trained locksmiths are at the heart of ensuring security for homes and businesses. That's why ABUS is committed to providing top-notch training that aligns with the unique needs of locksmiths.

Locksmiths' visit to ABUS Germany

For the biggest padlock manufacturer in the world, the ABUS factory in Phaffenhain in Germany is remarkably pastoral. Many ABUS locksmith customers from the UK have passed through its doors.

While we are happy to talk to locksmiths all day long about our cylinder systems, there really is no substitute for seeing with your own eyes first-hand the investment in people, plant and production that goes into literally making the best cylinder suites and padlocks available. That confidence in the quality of the ABUS product range that is part of the company's DNA comes from an understanding of the production and test processes carried out in Germany. The factory visits that ABUS organises for locksmiths gives customers a chance to see for themselves what it is that makes ABUS cylinder production so special.

Located in Phaffenhain in picturesque Saxony in Germany for 60+ years, the ABUS plant is an impressive place to visit. We guide locksmiths through the whole process, from design, through production and testing right through to dispatch.

The trip invariably leaves locksmiths impressed at the scale of the ABUS operations and the magnitude of the processes that go into producing our market-leading cylinders and padlocks.

UK training on tap

Did you know that ABUS offers training for locksmiths on some of its popular cylinder ranges?

We talked to Alexander Underwood from Abbey Gate, a locksmith and security engineering company, who recently attended a training course in Bristol on the Zolit cylinder suite, a range that Abbey Gate has just taken on.

MLA-member Abbey Gate Locksmiths is a local, family-run company with engineers permanently based in Newbury, Maidenhead and Reading covering a 50-mile area around Berkshire, and offering emergency locksmithing and door lock installation on both residential and commercial projects.

Three members of the Abbey Gate team visited Bristol to learn about pinning the Zolit system and came away with the confidence and knowledge to sell and operate the Zolit system. The company

chose Zolit for its good quality and masterkeying versatility at a reasonable price, backed by the famous ABUS customer service and expertise. The first Abbey Gate projects featuring Zolit are already coming to fruition so the team will be able to put their new-found knowledge into practice.

As well as training on specific ranges like Zolit, Bravus and Vitess, ABUS offers comprehensive locksmith training programmes designed to ensure that locksmiths have the skills and knowledge to build, install and maintain ABUS cylinder products effectively. The programmes cover both mechanical and electronic locking systems and are available in both online and in-person formats.

ABUS's training courses include a mix of theoretical and practical training, ensuring that locksmiths have a deep understanding of the products and the skills to install and maintain them effectively.

Anyone interested in ABUS training or trips to Phaffenhain should email info@abus-uk.com.
