OVERSIZE PUSH BUTTON

LOCKOUT DEVICE

Safety Lockout

This device provides a safe and effective method for locking out emergency push buttons. Paired with an ABUS padlock, this device will ensure facilities meet OSHA requirements and protect employees from fatal accidents.

Key Features

- Provides a lockout solution for oversize electrical push buttons on electrical panels or controls stations
- Can also be used on heavy machinery
- Installs in seconds
- Made from durable plastic (acrylic)
- Accommodates 1 padlock with a maximum shackle diameter of 1/4"
