## SAFETY DEVICE

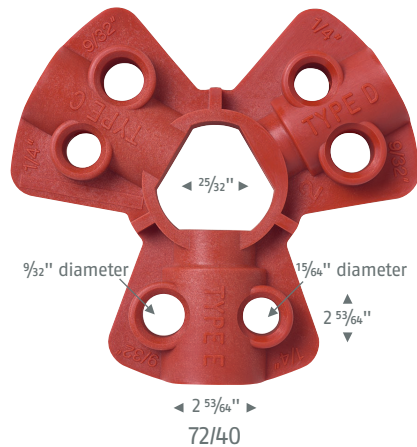

# COMPRESSED AIR LOCKOUT

### Universal Lockout Connection

The compressed air lockout has three different connections in different diameters so it can be used universally on all standard compressed air connections. Paired with an ABUS padlock, this device will ensure a facility meets OSHA guidelines and protects employees from fatal accidents.

### Specifications

### Key Features

- Made from fiber-glass reinforced nylon: long-lasting, robust and non-conductive
- 3 different connections for most common compressed air couplings with  $1\frac{1}{2}$ " outside diameter
- The hole in the middle can be used to attach and store the lockout device directly at the connection
- Holds 1 padlock with  $1\frac{5}{64}$ " and 1 padlock with  $\frac{9}{32}$ " shackle diameter per connection
