# SAFETY ALUMINUM GAS CYLINDER LOCKOUT

## Devices for Any Application

During maintenance work, gas bottles and gas connections have to be secured. The gas cylinder lockout is ideal because it prevents leaking of gas so employees are protected. A sticker can be attached to the device which clearly points out the lockout procedure.

## Key Features

- Made from high-quality polypropylene: long-lasting, robust and non-conductive
- Warning sticker included
- Holds 1 padlock with up to 23/64" shackle diameter

## Specifications

Item	Holds #Locks	Inside Height	Inside Diameter
P606	1	5 15/32"	3 5/64"
