

BRASS

83 SERIES® 2

Locksmith's Padlock of Choice

The 83/45 Series is made of solid brass that provides **extra resistance** in **corrosive and salty environments**. The special alloy steel shackle has a NANO PROTECT™

coating which also offers extra corrosion protection. The dual ball bearing locking mechanism resists pulling and prying giving it added security levels, making this an excellent choice in security padlocks.

Key Features

- Body made of solid brass
- Shackle made of hardened steel with NANO PROTECT™ coating for extra corrosion resistance
- Patented "Z-bar" converts key-retaining to non-key-retaining and vice versa within seconds
- Patented "Pinning Window" for simple rekeying
- Can be keyed into many popular keyways
- Shackle can be changed in seconds
- Cylinder cover available upon request
