

Secvest App (Android)

Art.-Nr. APP50200

Seite 1 von 2

THE ALARM SYSTEM IS ALWAYS WITH YOU. ON THE SMARTPHONE.

Simply more security everywhere

The free Secvest app is your central user interface for security from ABUS: For operating the alarm system, active notification in the event of an alarm, live view of the camera or to open the door.

Easy operation worldwide, free of charge

The free app allows you to operate the Secvest intuitively and securely from anywhere. In addition to viewing events such as breaking and entering, fire, emergency alarms etc., you can also arm, disarm or internally arm your system. In the event of an incident, you will immediately receive a push notification on the app.

Retrieving alarm images

By adding up to 6 IP cameras to your Secvest alarm system, you can use the app to access alarm images so that you can react immediately in the event of an alarm. Alarms can be verified at any time in the logbook - and by accessing the live streaming of the cameras, you can see directly what is happening at home.

Push notification in the event of an alarm

An alarm is reported to you immediately via push notification. This gives you an overview of what is happening and allows you to take further steps.

Convenient switching of outputs

The app can be used to switch specific switching outputs of the alarm system. In conjunction with a wireless socket, for remote control of lamps or other electrical devices, for example.

Technologies

- Operate Secvest wireless alarm system on the move
- Receive video footage and access live streams from the integrated IP camera
- Access the logbook
- Management of up to 3 alarm panels simultaneously

Technical data - Secvest App (Android)
