

ABUS IP video surveillance 4-Channel complete set

Art.-Nr. TVVR36321T

Seite 1 von 2

A complete package for a professional surveillance solution

Video surveillance made easy with everything in one set

This complete set makes it easier to install video surveillance indoors or in unprotected outdoor areas. The set includes a 4-channel network recorder with a built-in 1 TB hard drive for multi-week non-stop recording, two PoE-enabled outdoor Wi-Fi cameras, three power supply units and connection accessories.

Professional recording technology that is easy to operate

Depending on the setting, the recorder starts recording manually, following a time schedule or using a motion sensor. It can be operated conveniently using a mouse or via the ABUS iDVR Plus app. The video images are stored in brilliant quality at 25 frames/second (real time), only take up a small amount of space on the hard disk drive and have been optimised for quick network access via integrated broadband interface (1000 Mbit/s). The outdoor Wi-Fi cameras with IR night vision function and digital WDR function for optimal backlight compensation meet the requirements of protection class IP66 and are particularly suitable for continuous surveillance of entrance areas both at day and night. Up to four cameras can be paired with the system.

Quick and easy installation via router

The cameras do not have to be connected directly to the recorder. The cameras are paired with the router via LAN or Wi-Fi, either wirelessly or using the included network cable, with separate power supply to the individual camera.

ABUS IP video surveillance 4-Channel complete set

Note on the night vision function of the cameras

The effective IR range will depend on the installation location.

Technologies

- Complete set with four-channel network recorder, two 2MPx cameras, 1 TB hard disk drive, two 18 m network cables
 - Detailed full HD (2MPx) resolution of 1920 x 1080 pixels at 25 frames/second
 - Incl. 1 TB hard disk drive for approx. six weeks of continuous recording
 - Incl. 2MPx Wi-Fi camera for indoors and outdoors
 - Up to 4 IP cameras can be individually integrated over LAN or Wi-Fi
 - 4K HDMI output for simultaneous native view of four full HD (2MPx) IP cameras
 - Recording via motion detection, following a time schedule or continuously
