SAFE IN STYLE

With the high-quality AirLuxe riding helmet from ABUS Pikeur, you will experience a ride in a class of its own.

An innovative ventilation system with 17 ventilation openings and intelligent air channels ensures pleasant freshness - even on hot summer days. With the adjustment wheel at the back of the head, you always have the ability to adjust the size of the helmet optimally to the circumference of your head. The chin strap's length is also adjustable. Thanks to the height-adjustable Zoom Air adjustment system, the riding helmet sits comfortably and securely and is also ideally suited for those with ponytails and bun hairstyles.

Vegan straps made from faux leather and washable inner pads provide additional comfort. The inner pads are antibacterial and can be easily replaced at a specialist shop. The helmet's great suitability as head protection is proven not only by the numerous drop and impact tests it has passed, but also by various safety seals: the European VG1, the American ASTM and the British Kitemark standards. Furthermore, the helmet is PAS ready and approved for international tournaments. The AirLuxe even makes designer hearts beat faster: The helmet is available in three different versions, with a variety of inlays and with Long or Short Vvisor. From now on, wearing a helmet is no longer a duty, but a real pleasure.

Technologies

- 17 air openings and intelligent channels for improved air circulation and ventilation
- Ponytail compatibility: Helmet well suited for ponytail wearers
- Extra deep lower helmet edge for maximum protection
- Half ring: Half-enclosing plastic ring connected to adjustment system
