

Steel-O-Chain™ 9808K/170 black

THE ANSWER TO PICKING AND TAMPERING

The high-quality XPlus cylinder on the Steel-O-Chain™ 9808K chain lock provides excellent protection against manipulation of the lock and thus against theft.

No matter if someone tries to break into the bike lock or the XPlus cylinder with conventional tools, or even special ones - they won't get very far. The built-in XPlus cylinder and the 8 millimetre specially hardened steel chain provide great theft protection. In order to protect the paintwork on the bike in the long run, the chain is covered with a textile sleeve. Even the keyhole has a cover to protect it from dirt and corrosion. Well secured, your bike can be parked with no worries.

Technologies

- 8 mm square chain
- The chain, housing and structural parts of the locking mechanism are made of specially hardened steel
- Automatic keyhole cover to prevent corrosion and the ingress of dirt
- ABUS XPlus cylinder for the greatest protection against manipulation such as picking
- Two keys included

Use and application

- Great protection for when there is a high risk of theft
- Recommended for securing good bicycles, motorbikes and e-scooters
- Motorbikes
