GRANIT™ Detecto One 8078 2.0 blue

KEYLESS IS MORE

In version 2.0, the disc brake lock combines the proven mechanical security and smart technology of the previous model with an important innovation: an optimised Bluetooth® unit based on a newer standard, which ensures more stable connections.

Thanks to the rechargeable battery, simple control via the ABUS One app and encrypted Bluetooth® communication between the smartphone and the lock, operation remains particularly secure and convenient. The proven ABUS SmartX technology, a loud alarm that sounds in the event of any attempt to break open the lock and the 13.5 mm-thick locking bolt made from specially hardened steel ensure a high level of protection against theft.

Practical for everyday life: using the ABUS app, you can grant other people permission to unlock the lock. For example, family members, colleagues or friends can ride your motorbike home if you don't want to leave it unattended.

Technologies

- 13.5 mm locking bolt made of specially hardened steel
- Bike lock can be opened and locked without a key – keyless function based on proven ABUS SmartX Bluetooth® technology
- USB-C port
- Easy operation via the ABUS One app – for iOS and Android
- Storage of the motorbike's last parking location
- Alarm function with at least 100 dB for 15 seconds, then automatic re-arming
- 3D position detection – detects vibrations and the smallest of movements in all three dimensions and triggers an alarm
- The bolt, housing and structural parts of the locking mechanism are made of specially hardened steel
- Thanks to its automatic brake disc detection system, the lock can be transported closed without the alarm being activated
- Acoustic and visual signals (multi-coloured LED) indicate the battery and activity status
