

CombiLoop 205/200 black

Seite 1 von 2

Flexible, lightweight and long

Unattended helmets on bike handlebars or strollers left alone can quickly become easy targets for thieves. With the six-and-a-half-foot-long additional security lock known as the CombiLoop 205, you can securely protect your belongings.

This lightweight steel cable, weighing just six ounces, is highly portable, making it convenient for on-the-go use. To secure your items, simply insert the locking bolt, providing reliable protection against casual theft for multiple objects simultaneously. Its keyless operation adds to its practicality, as you can unlock it using a four-digit numerical code of your choice. This means your recreational equipment, bicycle accessories, or strollers remain well protected.

Technologies

- 13/64" strong steel cable
- Synthetic coating to prevent damage to the bicycle's paintwork
- Automatic locking at insertion of the locking bolt
- Individually settable code

Use and application

- Additional security to secure accessories
- Ideal for securing leisure or sports gear as well as objects

Tips

- Cable locks stand out due to good flexibility and quite low weight
- The combination lock is very well suited for the use by several people

Combiloop 205/200 black
