ACH 6000/120 BORDO™ Connect + Bracket SH

FOLDING LOCK MEETS FRAME LOCK

BORDO™ Connect rethinks security for your frame lock: as the first connection solution in folding lock design, it combines the stability and compact dimensions of a BORDO lock with the convenience of classic plug-in chains.

Instead of winding it up, you fold it up after use like a folding rule and transport it in the supplied holder on the frame to save space and avoid rattling. In combination with your frame lock, the simple ride-away protection becomes a real security upgrade: connect, plug in, done - without any additional keys. The 360° bolt engages from any position and makes securing your bike quick, intuitive and easy, even in the dark.

With a 120 cm fastening circumference, you remain flexible even when things get tight. Hardened steel, robust special rivets and intensive resistance tests ensure reliable protection for your e-bike - even with a higher risk of theft. Developed and manufactured in Germany, every BORDO™ represents more than 100 years of ABUS quality and over 20 years of folding lock expertise. Now also for your frame lock.

Technologies

- Folding lock design: innovative connection solution for frame locks in compact BORDO™ folding lock design
- Keyless insertion function: no additional key required – convenient locking via the existing frame lock and its key
- 360° bolt: round steel bolt engages reliably from any position – for greater convenience when locking up the bike, even in the dark
- 120 cm closing circumference: large operating radius for flexible connection options on fixed objects in urban environments
- SH bracket included: convenient mounting using a fixing strap and 3 mm Allen key – removal at the front for quick

ACH 6000/120 BORDO™ Connect + Bracket SH

access with little space required on the frame
- Special steel construction: 5 mm bars and load-bearing parts of the BORDO™ Connect made of hardened steel for high resistance to break-open attempts
- Special rivets: robust connecting elements increase the stability of each folding lock joint and strengthen the overall construction
- Coated loop ring: ring with protective coating enables simple and paint-friendly connection to fence, lamppost or bike stand
- Protection from scratches: coating of the steel bars reliably protects the bike frame from scratches
- Tried and tested: intensive resistance tests for exposure to weather and cold, as well as against typical break-open attempts with bolt cutters and impact tools
- Made in Germany: developed, manufactured and produced in Germany – ABUS quality and security expertise for more than 100 years

Use and application

- Suitable addition: perfect for bike and e-bike riders who want to expand their frame lock and flexibly connect their bike to fixed objects – ideal for everyday use, city life and commuting
- Solid theft protection: recommended for securing good bikes with a frame lock as a useful addition to the immobiliser
- Folding BORDO™ design: can be folded compactly and transported on the bike without rattling – more space-saving and convenient to transport than classic plug-in chains

Technical data - ACH 6000/120 BORDO™ Connect + Bracket SH

Length	120 inch
Weight [lbs]	1350 lbs
color of facets	black
design color	black
EAN	4003318131394
