BORDO™ 5800K/80 + Bracket SH

SMALL IN SIZE, BIG IN EVERYDAY LIFE

Are you looking for a lock that is lightweight and takes up little space, but can do a lot? Then the BORDO™ 5800K is your match.

It combines a particularly small pack size with a generous locking circumference of 80 cm. Thanks to the automatic locking system, you can lock your bike quickly and conveniently without having to dig out the key. The 360° rotating lock body makes it easy for you to connect from any position. While you are away, the 2.5 mm thick bars made of special hardened steel provide reliable protection.

After the journey, simply fold the lock up compactly. As a particularly practical feature, the supplied SH holder also fits small frame geometries. Thanks to the low holder holes, installation is possible even with bottle holder mounts close to the bottom bracket. This means you can transport your lock rattle-free directly on your bike, always have it to hand and don't have to stow it away. The coating protects the frame from scratches.

Like all folding locks in the BORDO™ family, the 5800K stands for tested quality and security made in Germany. Compact, lightweight and versatile - the BORDO 5800K adapts to your bike and your everyday life.

Technologies

- Compact design: mini format with a small package size and up to 80 cm locking circumference – ideal for light weight and flexibility in everyday cycling
- Special steel construction: 2.5 mm thick bars and mechanism made of hardened steel – for greater resistance to break-open attempts

BORDO™ 5800K/80 + Bracket SH

- 360° lock body: rotating lock body enables flexible alignment when locking up the bike – convenient handling in any position
- Special rivets: robust connecting elements increase the stability of each folding lock joint and strengthen the overall construction
- Automatic locking: the lock locks automatically when the end piece is inserted – convenient locking without additional locking process and key
- SH bracket included: convenient mounting using a fixing strap and 3 mm Allen key – removal at the front for quick access with little space required on the frame
- Low holder holes enable installation even with bottle holder mounts close to the bottom bracket
- Paint protection: plastic coating of the steel bars reliably protects the bike frame from scratches
- Made in Germany: developed, manufactured and produced in Germany – ABUS quality and security expertise for more than 100 years
- Tried and tested: intensive resistance tests for exposure to weather and cold

Use and application

- ABUS security level 7: good protection for low to medium theft risk – with anti-picking cylinder for more protection against tampering
