Element 290 yellow

10MM OF SOLID STEEL

The ABUS Element 290 Brake Disc Lock protects your scooter with a whole centimetre of specially hardened steel.

Once the Element 290 is fixed to the brake disc, it is no longer possible for a thief to make off with your scooter quickly. In contrast, locking the device takes no time at all: The locking bolt is activated directly with the push-down cylinder - something which is appreciated by frequent cyclists who lock and unlock their bikes several times a day.

In addition to protection and ease of use, the Element 290 also has the right accessories. With the included memory cable, you will never forget to remove the lock before starting your scooter. A second key is also included with the lock, as well as a transport bag.

Technologies

- 25⁄64" locking bolt
- Very easy to use thanks to the push-down cylinder which automatically locks the bolt into place when closed
- The bolt is made of specially hardened steel
- Two keys are included in the scope of delivery
- A memory cable which is included with the lock serves as a reminder to prevent accidental pulling away when the motorbike is still secured

Use and application

- Basic protection for when there is a low risk of theft
- Recommended for securing scooters

Tips

- Brake disc locks are the most compact type of motorbike lock which makes them easy to transport
- For increased security during longer parking periods, it is advisable to also secure the motorbike to a fixed object
