

P603 | Pneumatic Lockout Device User Manual

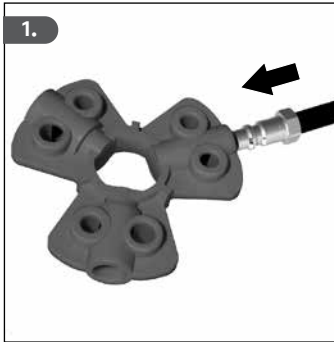

Security Tech Germany

Material Content:

a. Pneumatic Lockout Device P603

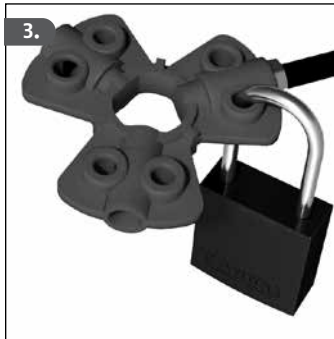

Application:

1. Disconnect the compressed air connection and insert the connector according to its size into one of the appropriate openings of the compressed air connection lockout device.

2. For this purpose, the lockout device provides three mountings with different diameters.

3. To lock the connector securely in the lock device, insert a padlock through one of the openings provided. There are two openings available depending on the selected shackle diameter.

4. Make sure that the compressed air connection lockout device cannot be removed and the connector is thus securely locked.

WARNING:

Product should only be used by personnel properly trained in lockout procedures. Product should only be used on the appropriate application (s). Follow product instructions for proper application of each product. Properly trained personnel should check to ensure that product is secure and equipment will not operate. Failure to follow product instructions and warnings may result in serious bodily injury or death.
